Project Description

DESCRIPTION

Primary subcontract for the marine & onshore scope associated with the Deep Panuke offshore gas pipeline landfall. The project included a 1,100m trench dredged in heavy till with both land and marine based rock blasting. The shore based transition trench was excavated and the pipeline pulled from the offshore Allsea pipelay vesse 'Lorelay' onto shore using a 500 ton Bezemer winch. The entire pipeline was carefully backfilled following the successful pull-in operations.

EQUIPMENT

BHD Canadian Argosy
Komatsu PC1250
Spud Barge Derrick No. 4
Tugboat – Jerry Newberry
Tugboat – Jamie L.
500 ton Bezemer winch

MATERIALS

All materials except causeway core and armour stone were supplied by the General Contractor
