Project Description

DESCRIPTION

This project created fish habitat to compensate for the destruction of fish habitat as a result of the Sydney Harbour Channel Dredging project. The work included the supply and controlled placement of 75,000 tonnes of Type II Armour Stone (10"-24" rock) within Sydney Harbour at depths of 4-15m in varying geometry.

EQUIPMENT

- "Beaver Kay" Barge
- American 9260 Crane
- "Mr. Joe" Tug
